

# Tools

The tools used to mod NSMB DS with a general overview of how to use them

- [NSMBe](#)
- [NCPatcher](#)
- [Fire Flower](#)

# NSMBe

NSMBe is a modding tool for New Super Mario Bros. (DS) It is a level editor and a texture editor.

# NCPatcher

NCPatcher is a program that modifies the executable binaries of a Nintendo DS ROM.

It was created because of the need to have more flexible patching features that other patchers did not have.

# Fire Flower

Fire Flower has been replaced by [NCPatcher](#)

Fire Flower is a patcher for Nintendo DS games. It works different to any other patchers and aims towards performance, user-friendliness and practicability.
